

EXPERIMENT-3

Aim

To develop a cloud-based Property Buying/Rental Application using Zoho Creator that allows users to search, buy, or rent properties in Chennai online.

Software Used

- Zoho Creator
- Web Browser (Chrome/Edge)
- Zoho Cloud Platform

Algorithm

1. Open Zoho Creator.
2. Create a new application named Property Buying/Rental System.
3. Add the required fields.
4. Enter customer and property requirements.
5. Click Submit.
6. Store details in the cloud database.
7. Display matching property requests and customer details.

Output:

The screenshot displays the Zoho Creator interface for an application titled "Property Buying/Rental Application" in the "Development" mode. The top navigation bar includes options like "View as", "MySelf", "Trial expires in 13 days", "Upgrade", "Edit this application", and "Help". A left sidebar menu shows the application name and navigation items: "Property Buying" (selected), "Property Buying Report", and a user profile for "KONASANI S...". The main content area, titled "Property Buying", contains a form with the following fields: "Customer Name" (text input), "Property Type" (dropdown menu), "Location" (dropdown menu), "Purpose" (dropdown menu), "Budget" (text input with a mask "###,###,###"), "Email" (text input), and "Phone" (text input with a country code dropdown set to "+91" and a pre-filled number "81234 56789"). A blue "Submit" button is located at the bottom right of the form.

Result

The Property Buying/Rental Application for Chennai was successfully developed using Zoho Creator SaaS. The application allows users to submit property requirements online and stores the details securely in the cloud.
