

EXPERIMENT-4

Aim

To develop a cloud-based Car Booking Reservation Application using Zoho Creator that allows users to book cars online and manage reservations through the cloud.

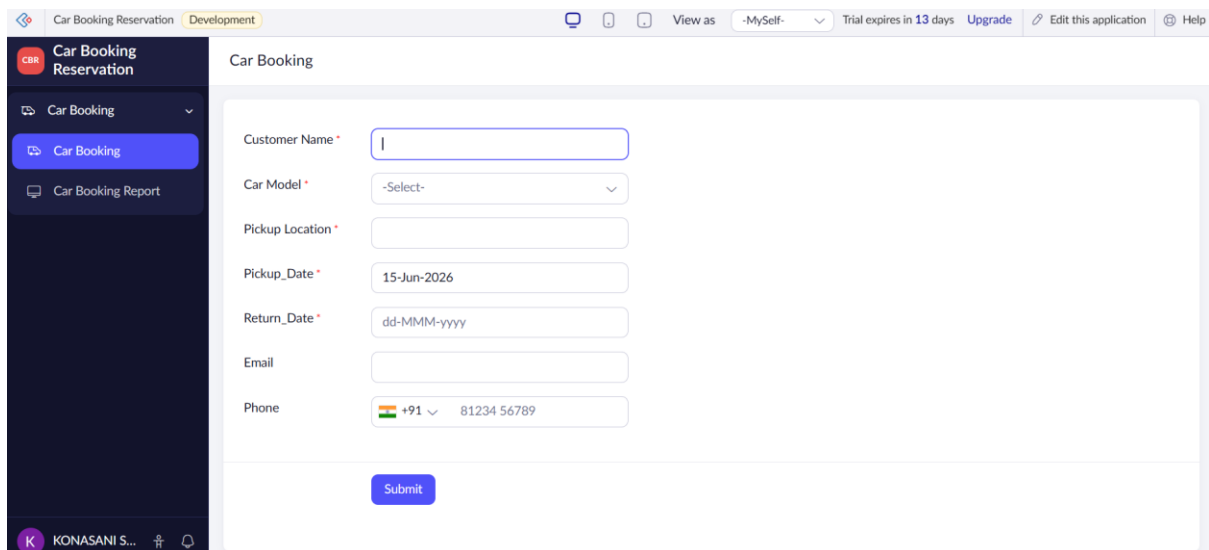

Software Used

- Zoho Creator
- Web Browser (Chrome/Edge)
- Zoho Cloud Platform

Algorithm

1. Open Zoho Creator.
2. Create a new application named Car Booking Reservation System.
3. Add the required fields.
4. Enter customer and booking details.
5. Click Submit.
6. Store booking details in the cloud database.
7. Display booking confirmation.

Output:

The screenshot displays the Zoho Creator interface for a 'Car Booking Reservation' application. The top navigation bar includes the application name, a 'Development' tab, and various utility links like 'View as', 'Trial expires in 13 days', 'Upgrade', 'Edit this application', and 'Help'. On the left, a sidebar menu shows 'Car Booking' as the active section, with 'Car Booking Report' also visible. The main content area, titled 'Car Booking', contains a form with the following fields: 'Customer Name' (text input), 'Car Model' (dropdown menu showing '-Select-'), 'Pickup Location' (text input), 'Pickup_Date' (text input with '15-Jun-2026'), 'Return_Date' (text input with 'dd-MMM-yyyy'), 'Email' (text input), and 'Phone' (text input with a country code dropdown set to '+91' and the number '81234 56789'). A blue 'Submit' button is located at the bottom of the form.
